JavaScript Security Part 3

INFOSEC

May 12, 2025

Akanksha Tamboli

has successfully completed the online Specialization

JavaScript Security

In this Specialization, we will investigate, prevent, and resolve JavaScript-related attacks and learn how to build safer JavaScript applications. JavaScript is a fundamental technology for building web applications and is also popular for building server-side, desktop, and even mobile applications. Most of this learning Specialization will cover front-end JavaScript; however, we will also consider Node.js. After completing this Specialization, you will understand the diverse threats and protections of the JavaScript world.

Infosec Instructor

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
